Q19	Using A-E as grades, what is your overall rating of the instructor?	21 70%	4 13.3%	2 6.7%	1 3.3%	2 6.7%	30	4.4	5	5	1.17

Responses: [A] A=5 [B] B=4 [C] C=3 [D] D=2 [E] E=1

Question:	What did you like about the course?										
Response Rate:	65.63% (21 of 32)										
1	webassign and the test.										
2	the way of instructor's communication										
3	the style of teach										
4	the material is sometimes easy but is explained in a very complicated way. my friend taught me something that i thought was so hard but ended up being so easy.										
5	it was a math class										
6	a nice professor. A clear and good teaching way;£										

7	The way that teacher taught	
8	The instructor. He got to know the students very well and overall made me like the course even more than I already did	
9	Teach us how to use Excel.	
10	Professor is great and funny.	
11	Professor was funny about non-related topics	
12	Professor is interesting and personable, and very helpful if you ask questions or go in for tutoring.	
13	Learned a lot	
14	Jill was the best possible facilitator for this class. She was informative, considerate, and all around a fun person to get to know.	
15	I really liked the instructor he does a good job of explaining concepts well.	
16	I liked that there was business applications.	
17	I liked the time and days in which it took place and England's style of teaching.	
18	I liked how he taught us the subject and how he would help us understand the material.	
19	I like the teacher. He is very nice and friendly. I also retained the information better than I did in High School.	
20	I enjoy learning certain math situations that could help me later in life.	
21	Good teaching	

Question: What did you dislike about the course? Do you have any suggestions to improve the course?		
Response Rate:	59.38% (19 of 32)	
1	sometimes webassign would not accept correct answers	
2	slower the pace of teaching.	
3	no	
4	We went through some lessons very quickly and there were concepts on the homework that we talked about in class but didn't go in depth enough for me to understand certain problems on the homework.	
5	This maybe so hard for some of the students and learning speed is so fast	
6	There is nothing I can think of to improve the course.	
7	The course is very fast pace in general. I feel like if I hadn't learned most of the material in highschool then I probably wouldn't understand it very well. So my suggestion would be to slow it down	
8	The assignments were too close together and it was hard to keep track of what was due when.	
9	Sometimes it is not clear. It will be better if he can add more process.	
10	Some is difficult to me.	
11	None	
12	I'm not a huge fan of math, but I could have used a bit slower of a pace. Overall it was an average math class.	
13	I dont like that there are only two exams before the final. Id rather have it broken up more.	

14	I do not like the physical homework only because it is a slight hassle trying to get it stapled and formatted correctly.	
15	I disliked that there are only 3 exams and then a final, and that the final is on a Thursday at 7pm. I feel that if there were more exams, students would be more easily able to retain information, and I hate that the final is on a Thursday because every other final ends on Wednesday and this made me have to cancel my vacation.	
16	For transfer students that have not taken math courses in 3+ years, this class was extremely difficult to follow. The professor was very unclear on teaching chapters and went extremely fast. It is still a math class, yet he refuses to discuss algebra related questions on calculus problems. Skips a ridiculous amount of steps and assumes that we follow. Very nice guy but an engineer shouldn't be teaching this class.	
17	Everything. Instructor and course were very hard to follow and I spent more time in the tutoring center trying to learn.	
18	Do not have extra credits.	
19	All things ok.	

Faculty:		Brian England
Question:		What did you like about the instructor or the method of instruction?
Response Rate:		53.13% (17 of 32)
1	was very engaging and never had a bad attitude	
2	he was super funny and chill. he acted like a friend rather than a strict professor.	
3	Went at a good pace and always offered time outside of class to help students	
4	She was very clear about all assignments and was willing to work with us when we had any questions.	
5	Professor is interesting and personable, and very helpful if you ask questions or go in for tutoring.	
6	Mr. England was enjoyable everyday, compared to other professors that could be sometimes boring.	
7	I like how he is friendly and tries his best to interact with the students and get to know everyone.	
8	He would give multiple examples of the materials and made it easier for me to understand the material.	
9	He was really funny and kept the class entertained.	
10	He was funny.	
11	He is very good at explaining the concepts and he is easy to relate to because he is also a student	
12	He is hard working.	
13	He is generally a nice guy.	
14	He gets straight to the point and has a lot of office hours.	
15	Good teaching	
16	Funny and interesting	
17	England was incredibly thorough and knew exactly what he was talking about. He provided step by step processes as well as tons of example problems.	

Faculty:		Brian England
Question:		What did you dislike about the instructor or method of instruction? Do you have any suggestions to improve instruction?
Response Rate:		53.13% (17 of 32)
1	would sometimes use engineering examples that were irrelevant	
2	too fast	

3	he went to fast and didnt explain some steps.	
4	We went through some lessons very quickly and there were concepts on the homework that we talked about in class but didn't go in depth enough for me to understand certain problems on the homework.	
5	Sometimes a little bit fast. He talked a liitl fast for international students so I can't catch the words he said sometimes.	
6	Refuses to answer any "algebra related" questions. Skips way to many steps and assumes that the class is following. I suggest he goes slower during instruction and goes step by step. And stop saying that this is "easy" work. Not everyone is good at math.	
7	Nothing. He taught the material very well and answered all our questions so I do not have any suggestions as of right now	
8	None	
9	N/A	
10	Maybe making some easy thing in exams.	
11	I would say make the tests easier because why not.	
12	I loved my instructor.	
13	I liked the way he taught. No complaints.	
14	I do not have any suggestions	
15	I do not have any negative comments for the instructor.	
16	He went very fast-paced, but overall was great in his grading style.	
17	He wasn't effective at teaching the subject. He would just jump from one step to another assuming we knew how to do it. He assumes we have basically taken the course and should already know how to do it.
