Question:	What did you like about the course?
Response Rate:	52.94% (18 of 34)

1	videos, resources, discussions	
2	useful assignments	
3	the simplicity that it provides in course materials and instructions.	
4	teacher is easy to reach and the course is organized well	
5	online	
6	nothing	
7	Videos	
8	Straight forward	
9	Nothing	
10	Nothing	
11	It was quick	
12	I liked the pace and work level of the course	
13	I liked the variety of teachers and I liked that each teacher was motivated and engaging	
14	I liked how it was structured.	
15	I like the class. Quizzes were fairly fair. EXAMS WERE SO MUCH HARDER THAN HOMEWORK NORMALLY WAS AND QUIZZES. AND THEY ARE WORTH 30% AND 40% OF GRADE. I might have to retake course because I got a D on the first exam, even after doing all the homework flawlessly and studying a bunch. Not fair how curriculum is graded.	
16	I enjoy the content	
17	For a class like this one I think the 8 week, online aspect suited it perfectly. I think linear algebra should never be a 16 week course, even if not online ASU should schedule more 8 week linear algebra courses.	
18	Ability to access everything from a single sight with few confusions.	

Question:	What did you dislike about the course? Do you have any suggestions to improve the course?
Response Rate:	61.76% (21 of 34)

1	tests and quizzes are way to difficult	
2	pdf. of example problems instead of only looking at the videos	
3	nothin	
4	method of test	
5	^^^ how it is weighted.	
6	There was often material that we were quizzed on that was not in the lectures	
7	The lecture videos were not helpful at us	
8	The course was extremely difficult and the professor gave little help other than answering discussion board questions. Professor was understanding about some technological difficulties that can happen with an online course, but gave little extra insight into the course content itself.	
9	That the tests and quizzes had to be taken on a certain day. Also the homework for some chapters did not corellate at all to what was taught and resulted in a substantial loss of points in the homework area.	
10	Nothing.	
11	Not enough examples	
12	None	
13	N/A	
14	It was too rushed and way too fast paced to learn properly	
15	I sometimes had difficulty making sense of the schedule. I think the professor should email the students at the beginning of each week with a list of what is expected of the student that week (i.e. what assignments need to be done, topics to be covered, etc.).	
16	I like everything about the class	
17	I disliked how much content there was, I feel like for a session B class there is more material than time.	
18	I dislike that the last exam and the final are one day apart because it doesn't give enough time to study for the final	
19	Give more note about each topic. Sometime the video professor give us is not useful for homework.	
20	Content did not always align with the tests. Homework and lecture notes aligned perfectly and were understood, but the proctored exams did not seem to ask questions related clearly to the lecture work.	
21	1- the fact that the tests are through WebWork kind of annoys me because the numbers are randomly generated and aren't always fair. For instance, on a problem where I was to find the unknown value of x in a matrix, I was forced to use the quadratic formula (without a calculator). I couldn't remember the formula exactly, and my score dropped a whole letter grade because of this. Other students I talked to got simple, easily factored solutions.	

Faculty:		Brian England	
Question:		What did you like about the instructor or the method of instruction?	
Response Rate:		41.18% (14 of 34)	
1	prompt responses. Easy to communicate with. courteous and understanding.		
2	nothing		
3	nothing		
4	not really.		
5	lectures were good quality		
6	how fast my questions are answered and how simple he makes the class.		

7	good	
8	all up front to learn	
9	The instructor was good about updating students on website/testing errors.	
10	The instructor was readily available and whenever there were problems with accessibility students were given extensions to pad that.	
11	Quick with responses	
12	I like the communication from the instructor	
13	He was really good at keeping communication.	
14	Always available for questions or communication. Helpful and offers strong guidance.	

<b>Faculty:</b> Brian England		
<b>Question:</b> What did you dislike about the instructor or method of instruction? Do you have any suggestions to improve instruction?		
<b>Response Rate:</b> 47.06% (16 of 34)		
1	the instructor himself never actually taught	
2	npthing	
3	no	
4	nothin	
5	not a lot.	
6	Videos did not cover all of homework or exam problems which really confused me.	
7	There was almost no interaction	
8	Professor England is rather rude in his emails, which is difficult to actually convey because he is not speaking, but he manages it pretty well.	
9	None	
10	My only problem was the issue of the exams not necessarily aligning with the course homework and lecture.	
11	I would have benefited from more communication from the instructor towards the class.	
12	I think example problems similar to the webwork problems would be helpful. Sometimes the videos and notes were insufficient in teaching the chapter, making it difficult to complete the webwork.	
13	He didn't teach, someone else did	
14	He didn't instruct anything. He wasn't in the videos, I don't think he wrote any notes, and he didn't give us much supplemental material. (review worksheets, etc.) The only interaction we had was if someone asked something in Piazza, and he usually was impatient with students.	
15	First of all, apparently the instructor did not design this course, so I don't even know if he has the right qualifications or if he just looks at a cheat sheet. If anything the instructor should have been one of the two gentlemen in the instuctional videos.	
16	Cant think if anything at the moment
