Question:	What did you like about the course?										
Response Rate:	86.67% (13 of 15)										
1	professor explained things well, and did homework problems in class.										
2	integrals										
3	i didnt have a choice but i appreciate that it was more of calculating less reading										
4	The syllabus it covers is so much helpful for my other courses and the professor also clears the doubts.										
5	The concept										
6	Nothing										

7	No quizzes. Grade is only affected by HW and Exams. And Exams are curved fairly if reasonable.	
8	NA	
9	It was involved, and when you understood the topics, it wouldn't be a slow class of relearning the material.	
10	I liked the way the instructor provided numerous examples of our homework by completing them in class at our command.	
11	I liked everything about this course.	
12	He went through the homework with us which really helped my understanding of calculus.	
13	Fast paced, goes through webwork problems	

Question: What did you dislike about the course? Do you have any suggestions to improve the course?		
Response Rate: 80.00% (12 of 15)		
1	the mind numbing questions	
2	Way too early	
3	WORK	
4	Stuff covered at the end of class(polar, series parametric), should've been covered earlier.	
5	Sometimes he went a little fast which confused me.	
6	Sometimes it was hard to keep up with the pace of the course. But researching the topics online and studying them in my own time made up for it.	
7	Sometimes the class was too fast-paced and it may be difficult to learn a topic for the first time in the class session.	
8	None	
9	No recorded videos and lecture slides. Attendance required to listening to lecture.	
10	NA	
11	I think the timing was not too good and because of that I missed many classes.	
12	I think this professor is doing a great job.	

Faculty: Brian England		
Question: What did you like about the instructor or the method of instruction?		
Response Rate: 86.67% (13 of 15)		
1	hes quick to explain the subject and show quick ways to solve the problems	
2	he is down to buisness and gives good applications and examples of problems.	
3	Work load	
4	Professor England was rather easy to follow along. He was helpful with the concepts we struggled with and tried to show how he saw the material as well as understand how we could see it.	
5	NA	
6	Like I previously stated, I liked how the instructor went over most of our homework for us at our command. The method of instruction was very organized and efficient. The instructor's handwriting was very neat too.	

7	Instructor has knowledge of mathematics in depth. Really confident with mathematics and hilarious sometimes	
8	I think this professor is doing a great job.	
9	He's down to earth	
10	He worked on homework problems in class, and got material learned on time. The previous time I took this class, the professor took too long to explain things, which led to rushing to cover the last material. His was balanced, and gave us excess time to review for the tests.	
11	He covered every single situational aspect that we would cover in the course.	
12	He approaches concepts from a logical perspective and some little insights on how the methods are applicable.	
13	Fast paced more time left for review or questions	

Faculty: Brian England		
Question: What did you dislike about the instructor or method of instruction? Do you have any suggestions to improve instruction?		
Response Rate:	73.33% (11 of 15)	
1	he moves too quick	
2	he can come off as harsh or blunt, which is good in some cases but there may be times where there is a better method to solve a problem in class.	
3	Teaching pace	
4	Sometimes he goes a little too fast.	
5	Sometimes the instructor went a little too fast for me to keep up with what was going on in class, but I honestly got used to it as time went on. After a while, I didn't mind as much because I started to realize how much they covered in class.	
6	Nothing	
7	None.	
8	NA	
9	I think this professor is doing a great job.	
10	However, not a good teacher because instructor likes solving difficult problems without explanation in high pace. Rarely giving basic problems before moving on to harder problems.	
11	He would just write the notes out which sometimes wasn't the most convenient.
